**DETAILED ACTION**

**Drawings**

The drawings are objected to because only black and white photocopies of the drawings are included in the case file. It appears from the papers available to the Examiner that Applicant filed appropriate color photographs that have become disassociated from the case file. While the Examiner extends her apologies for this mix-up, new drawings are still required in reply to the Office action to avoid abandonment of the application. The objection to the drawings will not be held in abeyance. Applicant is reminded that allowance of the application is not possible until new drawings are provided, as the claim is to the plant as *illustrated* and described. Further information regarding the submission of drawings to the Office is included below.

**Objection to the Disclosure**

**37 CFR 1.163**

**The following is a quotation of section (a) of 37 CFR 1.163:**

*(a) The specification must contain as full and complete a disclosure as possible of the plant and the characteristics thereof that distinguish the same over related known varieties, and its antecedents, and must particularly point out where and in what manner the variety of plant has been asexually reproduced. In the case of a newly found plant, the specification must particularly point out the location and character of the area where the plant was discovered.*

**35 USC § 112**

**The following is a quotation of the first paragraph of 35 U.S.C. 112:**

*The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.*

**The following is a quotation of the second paragraph of 35 U.S.C. 112:**

*The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.*

Art Unit: 1661

**As specific to United States Plant Patent applications, the specifics of 37 CFR 1.164 (reproduced below) are controlling:**

*The claim shall be in formal terms to the new and distinct variety of the specified plant as described and illustrated, and may also recite the principal distinguishing characteristics. More than one claim is not permitted.*

**In plant applications filed under 35 U.S.C. 161, the requirements of 35 U.S.C. are limited.**

**The following is a quotation of 35 U.S.C. 162:**

*No plant patent shall be declared invalid for noncompliance with section 112 of this title if the description is as complete as is reasonably possible. The claim in the specification shall be in formal terms to the plant shown and described.*

The disclosure is objected to under 37 CFR 1.163 (a) and under 35 U.S.C. 112, first paragraph, because the specification presents less than a full, clear and complete botanical description of the plant and the characteristics which define same per se and which distinguish the plant from related known cultivars and antecedents.

**More specifically:**

A. Applicant must provide the botanical name of the instant plant beneath a separate heading at the beginning of the specification in order to comply with 37 CFR 1.163(c)(4). Correction is required.

B. Page 2, Table 1 is blank. Table 1 must be filled in or deleted.

### **Claim Rejection**

#### **35 U.S.C. § 112, 1st and 2nd Paragraphs**

Claim 1 is rejected under 35 U.S.C. 112, first and second paragraphs as not being supported by a clear and complete botanical description of the plant for reasons set forth in the Objection to the Disclosure Section above, and under 35 U.S.C. 112 first paragraph for the reasons advanced in the objection to the drawings.

### Drawing Changes

Applicants are advised of the changes to 37 CFR 1.84 which took effect November 29, 2000. In particular, 37 CFR 1.84(e) now states, in part:

*Photographs must be developed on paper meeting the sheet size requirements of paragraph (f) of this section and the margin requirements of paragraph (g) of this section.*

The USPTO no longer accepts photographs mounted on bristol board, paper or other material. Further information on the new rules is available on the USPTO web site at:

<http://www.uspto.gov>.

Mail sent to the USPTO is regularly irradiated due to concerns about domestic terrorism. Irradiated photographs have a tendency to melt. Accordingly, Applicant should send substitute drawings to:

USPTO  
PO BOX 2327  
Arlington, VA 22202

OR hand-carry or deliver the drawings via Federal Express or UPS to:
